🔗 Portfolio

Profile

Senior Flutter Engineer with 4+ years of experience building and scaling production-grade mobile platforms across fintech, healthcare, real-time communication, and data-driven consumer apps. Proven track record in architecting offline-first systems, real-time voice and messaging platforms, secure data pipelines, and high-performance Flutter applications deployed to Google Play and the App Store. Experienced in Clean Architecture, state management, real-time systems, and large-scale app maintenance with strong ownership of delivery, performance, and reliability.

Education

2015 – 2019 **Technical Computer College**
Damascus University
Software Engineering, Mobile Development

Professional Experience

2026/03 – Present **(Senior Flutter Developer)**
Ultrawares

- Refactored and enhanced a large-scale **IPTV application**, improving performance, code maintainability, and streaming reliability.
- Worked on continuous improvements and feature development for **Sawa mobile application**, focusing on stability, UX enhancements, and bug fixing.
- Currently developing and maintaining **Askoonect**, a tendering and procurement platform, including dynamic workflows, API integrations, and scalable architecture.
- Applied Clean Architecture principles and modular design to ensure long-term maintainability and scalability across projects.

Technologies: Flutter, REST APIs, Clean Architecture, State Management (Riverpod), Performance Optimization

2024/10 – 2026/02 **(Senior Flutter Developer)**
Dream WD LLC

- Own and maintain a production-grade real-time voice platform supporting live audio rooms using **Zego Cloud and WebRTC**, including background audio services and Firebase-based signaling.
- Designed and stabilized a **low-latency audio pipeline** supporting 50+ concurrent speakers per room with reconnection handling, network fallback, and audio focus management.

- Lead development of a national-scale **Qatari Calendar platform** delivering prayer times, Qibla direction, Adhan notifications, and offline religious content across Android and iOS.
 - Implemented background scheduling, timezone-aware notifications, and resilient data caching to guarantee reliability even when the app is not running.
- Technologies:** Flutter, WebRTC, Zego, Firebase, Background Services, Push Notifications, Clean Architecture.

2023/10 – 2024/08

Flutter Developer

Vroad LLC

- Led delivery of **six production mobile applications** deployed to Google Play, TestFlight, and the App Store, supporting logistics, service booking, and business operations.
- Owned approximately **one-third of all active mobile products**, managing architecture, releases, hotfixes, and feature delivery end-to-end.
- Built scalable UI systems and API integration layers using **GetX, REST, and offline caching**, enabling stable operation under poor network conditions.

Technologies: Flutter, REST APIs, GetX, Firebase, App Store & Play Store distribution.

2022/06 – 2023/10

Flutter Developer

Future Code LLC

- Engineered **three production mobile platforms** including captain tracking, e-commerce, and real-time operations systems.
- Built **Socket.IO** [↗](#)-based **real-time communication layers**, reducing message latency and improving live update reliability for dispatch and tracking systems.
- Delivered performance-optimized UIs and custom widgets that significantly improved engagement and session duration.
- Designed local caching and sync pipelines to allow **offline operation with seamless server reconciliation**.

Technologies: Flutter, Socket.IO [↗](#), REST APIs, Custom UI, Offline Sync.

Projects

TMKN | تمکن — Educational Platform [↗](#)

Smart digital learning platform connecting teachers and students.

- Online lessons and recorded educational videos
- Teacher–student communication and announcements
- Course materials, notes, and assignments access
- Secure authentication and user roles (teacher / student)

Tech: Flutter, REST APIs, Firebase Cloud Messaging, Secure Storage

Fitnet — Fitness & Performance Platform [↗](#)

A real-time fitness tracking system supporting workout analytics, coach-driven training plans, and multimedia exercise content.

- Real-time activity tracking and analytics
- Coach dashboards and performance reporting

- Scalable cloud-synced user data model

Tech: Flutter, Firebase, REST APIs, Charts, Media Handling

Quick Findout — Inventory & Workforce Platform

Enterprise-grade warehouse and staff management system used to monitor stock flow and employee activity.

- Role-based access control
- Real-time stock and attendance tracking
- Advanced reporting dashboards

Tech: Flutter, Drift (SQLite), REST APIs, GetX

Doctor Fahd Platform — Healthcare System

Subscription-based telehealth and patient management platform.

- Secure patient-doctor messaging
- Medical history & nutrition tracking
- Subscription and payment workflows

Tech: Flutter, Firebase Cloud Messaging, Secure Storage, REST APIs

CORE TECHNICAL EXPERTISE

- **Mobile & UI**

Flutter, Dart, Material & Cupertino, Custom Renderers, Animations, Adaptive UI, Deep Linking

- **Architecture & State**

Clean Architecture, BLoC, Cubit, GetX, Riverpod, Dependency Injection, Repository Pattern, Reactive Streams (RxDart).

- **Data & Offline Systems**

Drift (SQLite), ObjectBox, Hive, Offline-first Sync, Conflict Resolution, Local/Remote ID Mapping.

- **Networking & Realtime**

Dio, Retrofit, REST APIs, WebSockets, Socket.IO, WebRTC, Zego Cloud.

- **Cloud & Backend Integration**

Firebase (Auth, Firestore, FCM), Background Services, Push Notifications.

- **Security & Performance**

AES / RSA encryption, Secure Storage, App Hardening, Memory & Rendering Optimization.

- **Release & Distribution**

Google Play, App Store, TestFlight, CI/CD, Multi-environment builds.

- **AI & Developer Tooling**

- AI-assisted development using ChatGPT, Claude, Cursor, and Copilot for code generation, debugging, and refactoring
- Prompt engineering for consistent and reliable AI outputs in development workflows
- Rapid prototyping and feature scaffolding using AI tools
- Codebase analysis and optimization using AI agents
- Integrating AI APIs into mobile applications (chat, automation, smart workflows)
- Using AI to accelerate development cycles and improve engineering productivity
